Udemy

Remote  
Aug 2022- Nov 2022

- Throughout this comprehensive course, I cover a massive number of tools and technologies, including: Html, CSS, Bootstrap, JavaScript, Node, Express and REACTJS.

### Android App Development using Java

Udemy

Remote  
Jan 2022-Apr 2022

- Throughout this App Development course, I cover a massive number of tools and technologies, including:XML, Java and build real time project.

## Projects

**Women Safety Application** | XML (for frontend), Java and Json (for backend).  
2022

- In this project, this application helps to send SOS messages to guardian and friends is the major advantage of this feature. If it's triggered, it sends messages to the guardian mobile and alerts them.
- Users can search a police station from their nearby location. It is easy to make a complaint in an emergency situation.

**WhatsApp Clone** | ReactJS, Javascript, CSS, HTML, Node Js.  
2022

- Users can send messaging just like WhatsApp.
- Users can share their status.
- Users can Share images, videos etc.

**Spotify Clone** | HTML, CSS, Javascript.

2023

- This is music web application.
- Users can listen songs.

## Technical Skills

Languages: C, Java, XML, HTML/CSS, JavaScript.

Frameworks: React.js, Node.js, MongoDB, Express.js, SQL.

Developer Tools: GitHub, VS Code, Atom, Android Studio.

## Achievement

- Secured 2 rank in App development battle at State level Tech-Fest.
